

Kap Klimber™

A Precision engineered, patented, one-touch and 4 points of contact system for 3PL and fleets.

Solving Slips/Falls...

Accessing trucks and trailers is a **major operating hazard** for drivers.

- **Falls** cost U.S. employers **\$5.78 billion** per year.
 - Trailer-access falls, specifically, are estimated to cost **\$280–\$420 Million** to the trucking industry.
- The average **slip-and-fall workers' comp claim** costs **\$54,499**:
 - Up 84% over the past 25 years.
- **OSHA** states there is **"typically no feasible means"** of providing fall protection on a trailer... **UNTIL NOW!**
- **New drivers** account for a major proportion, **37%** of injuries and **34%** of claims
 - A direct exposure for fleets managing **94%** annualized driver turnover.

Kap Klimber - Lead in the Solutioneering...

Safety of employees front and center. A single avoided slip-and-fall claim offsets the installed cost of **10+ Kap Klimber Units**.

- Replace flimsy vertical ladders and unsafe jumps with an **automatic** unit that **deploys in 7 seconds**.
- Easier than installing a liftgate, with a universal mounting bracket designed for many trailer/bodies.
- Built to last: Push button tested for **+35,000 cycles (10 Years)**, road salt, vibration, and repeated impact.
- Integrated with engineered fail safe systems, and backed by a limited **3-year warranty**.

Confirm Your Fit

- Box truck, Dry Van, Flatbed, Curtain Side or any trailer with:
 - Side Access
 - Standard trailer electrical connections
 - Min. Depth **(A)**: 30 in
 - Min Width **(B)**: 44 in
 - Min/Max Ground Clearance **(C)**: 37 - 60 in (50 in recommended)
